This Company takes Marine and Inland Navigation Risks on Merchandise, Freight and Hulls of Vessels. On the payment of Premiums a Rebate or Discount on the current rates is made IN CASH, as an equivalent for the Scrip Dividends of a Mutual Company. The amount of such Rebate being fixed according to the character of the business, gives to dealers a more just apportionment of profits than by the mutual system; and being MADE IN CASH, on payment of the Premiums, is more than equivalent to the CASH VALUE of the average Scrip Dividends of Mutual Companies. Policies issued, making loss payable in Gold in this City, or in Sterling at the Office of the Company's Bankers in Liverpool, if desired.

### MR. CONKLING ON FINANCE.

On Thursday Mr. Sherman's financial measure was called up in the Senate, and although there is happily no chance of its becoming a law during this session, it was allowed to occupy the attention of the Senate for a good part of the day. We regret its introduction, the less, however, as an opportunity has thus been given to show that such a law promises far more of evil than of good. We will not follow Mr. Conkling throughout the elaborate arguments with which he so vigorously assailed the bill. Most of these arguments we have often used ourselves. There are two or three points to which alone we need refer, in connection chiefly with the third section of the bill, which have not been heretofore discussed at length in the CHRONICLE.

The speculators in Government bonds would have abundance of profitable occupation if any such provision as is contained in this section should ever be enacted. Among its mischievous consequences it would result in reducing the five per cent Ten forty bonds to par. This is effected partly certainly by providing that any person may buy Ten-forty

bonds at par from the Treasury. Now these bonds sell at present in Wall street at more than five per cent premium, exclusive of the accrued interest. Why should the price be thus put down five per cent? and if the Ten-fortys be reduced, how will it be possible to prevent the decline of this description of Government bonds from depressing all other descriptions, and lowering their price five per cent in conformity?

These points are well put by Mr. Conkling, but there is another view of the case to which he did not direct attention. If there were a fair prospect that the change above referred to would take effect on the first of March next, it is needless to ask what would be the effect upon the market price of Government bonds at the Stock Exchange? An element of insecurity and incertitude would be introduced which could not fail to cause daily fluctuations in prices. The telegraph would be busy, reports conflicting and mischievous would be freely circulated, and as the prospects of the bill rose or fell at Washington the prices of bonds would rise and fall in Wall street.

This is just the kind of a market which the speculators want, in order to reap a rich harvest. Oscillations in values are what they want, stability they detest. It is quite the contrary with the investors who have put their money into Government bonds for safe keeping, at the present prices. These bona fide investors would lose considerably, and many of them would be tempted to sell out in disgust. Hence the prices in Wall street might possibly be depressed below par but for another provision of the new law introduced in an amendment by Mr. Cattell. This amendment compels the Government to buy back its Ten-Forties under certain conditions, at par, so that they could not fall below except for a short time. From what has been said it is evident that the fluctuations produced in the market, both before and after the passage of the bill, would be limited to the range of five per cent, but within these bounds there would be room for the most active manipulation and corruption by speculative cliques. Great capitalists would be placed under irresistible temptations to combine together to enrich themselves at the expense of the public and of the Government credit.

These mischiefs would, however, be much increased by the fourth section of the bill, which empowers the Secretary of the Treasury to issue demand notes, payable in gold, and with them at his discretion to purchase Government six per cents; and at the option of the creditor they are also payable for coin liabilities of the United States. The issue is limited to the amount of coin and bullion in the Treasury, and they may be reissued as the exigencies of the public service may require. In other words, the trouble in the bond market is to be supplemented by trouble in the currency. The Secretary would have power to make himself the autocrat of the

market to turn the existing currency into bonds, which would themselves become currency and pass from hand to hand, preferred to bank notes or legal-tender notes because bearing interest and convertible back again at any moment into notes. This would result in the payment of interest upon the whole or a large part of the legal-tender currency. An amendment proposes to restrict the par sales of Ten-Forty bonds to \$2,000,000 a month. This might diminish the evil, but it might also aggravate it. Once a month there would be a moderate spasm of contraction; once a month there would be an immoderate scramble for the forthcoming bonds; and thus if the same depression of the market value of securities did not occur, fluctuations, alleged favoritism and recurring contractions must ensue like those, the reports and suspicions of which, have so long brought reproach on the Treasury and its management. Mr. Conkling well exclaims, in view of these aspects of the bill, "before consenting that such power should pass into the hands of a Minister of Finance, if I could not take 'a bond of fate,' I should at least require to know who the Minister was to be. He should be fit, not only to administer his department, but to be the autocrat of the market. Men would laugh, or they would cry, at the wave of his wand."

We cordially agree with Mr. Conkling in his policy of funding the United States bonds at a lower rate of interest; of retiring gradually the United States notes; the legalizing of coin contracts; the organization of banking on the basis of a circulation equivalent to specie, and a policy generally that will not leave us as far off from a restoration of a sound currency years hence as we are now. And we oppose Mr. Sherman's bill because it not only would not help forward this policy, but because it would impede and hinder it, by fostering mischievous speculation and by adding further derangement to our monetary circulation.

#### TUNNEL RAILROADS FOR NEW YORK.

Until within the past few weeks, it was generally believed that the work of tunneling Manhattan Island, for the purpose of establishing underground railway communication between the different sections of the city, was soon to be begun. The charter granted by the last Legislature to a company formed for that purpose, conferred the necessary authority to undertake the work; and as the corporators were well known as responsible and wealthy citizens, it was confidently predicted that the work would be fairly inaugurated before the close of 1868. It appears, however, that in the enabling act there were several unnecessary conditions and restrictions, which prevented the complete organization of the company, so that the act itself was allowed to expire by limitation on the first of January. The subject, however, is again before the Legislature, in the form of an application for an extension of the charter, unrestricted by those conditions with which the organizers of the original company—though we believe acting in good faith and with a determination to carry the undertaking through—found it impossible to comply. In view of the great value of such a work to both city and State, the Legislature should promptly grant the request thus made, or adopt at once some better plan for an underground road, so that the work may be begun and completed as rapidly as circumstances will permit.

It is impossible to over-estimate the importance of this long needed improvement. We have frequently referred to it in these columns, but it is a subject of such vital interest, not only to the residents of the city but to the commerce of the whole country, that it cannot receive too frequent atten-

tion. As a means simply of rapid transportation of passengers between New York and its outlying suburbs, it is becoming almost indispensable. The necessarily slow rate of speed permitted on surface roads, renders a passage of even a few miles a tedious and disagreeable ride; and in consequence of the time lost in going back and forth, many are cut off from the privileges and advantages which the better air and cheaper rents of the outskirts of the city afford. This, perhaps especially affects the laboring classes, whose necessarily early hours require them to spend the least time possible in going to and from their homes. Hence they are compelled to seek accommodations where they are scarce and rents are high, and where their children are surrounded by associations debasing and ruinous. But aside from the moral aspect of the question—which is by no means to be overlooked or forgotten—the deprivations suffered in being cut off from low rents is very serious, and in fact reacts very seriously on every branch of business into which their labor enters; for the increase in the cost of living must really be paid by the employer. Besides, under existing arrangements, an equally burdensome tax, as we have already stated, is laid on the time and comfort of the entire community, making evident to the minds of all that the present mode of transit is totally inadequate to the requirements of this rapidly expanding city.

But this is merely a local view of the advantages of the tunnel road. The commerce of the whole State, and, in fact, of the whole country, is directly interested in the completion of this great public improvement. It is unnecessary to dwell upon the importance of New York to the commerce of the State and country. The vast trade that has centered here, the volume of produce which is daily brought to our wharves from West and South, to be distributed to all parts of the world, sufficiently indicate this importance. Now, however, all this freight, or all that is brought overland—and the proportion thus carried is increasing every year—must be carted through the city and trans-shipped once or twice, making the cost of transferring merchandise from one side of the city to the other about as great as the freight charges from Buffalo to New York. How easily and quickly a tunnel road would change all this. As soon as a central tunnel is constructed through the entire length of the city, branch tunnels will be added, a bridge suspended over the Hudson River, by which all the main lines of travel and freight transportation may be brought to Manhattan Island, and the freight thus collected be sent rapidly and cheaply, without breaking bulk, through the city to the wharves along our river fronts. All this would necessarily and materially diminish the cost of transportation, benefitting the producer and consumer equally, and thus materially increasing the volume of freight flowing through New York—which the lower rates would attract—and benefitting our canals and railways.

There is also every reason to believe that such a tunnel road will be constructed as soon as the Legislature grants the proper charter rights and privileges. There are no good grounds for supposing that the work, if properly undertaken, could not be carried through and made completely successful. It is true that the peculiar topography of the island, including the vein of quicksand extending from Worth to Canal streets, the low, wet, marshy section immediately north of it, and the hills of solid rock that extend from Thirtieth street to Fort George and Washington Heights, present many engineering difficulties that will only be overcome at considerable expense of money and labor; but they are by no means insurmountable. The necessary energy and capital can and will be provided as soon as legislation is obtained authorizing the work.

## NATIONAL BANKS OF EACH STATE—THEIR CONDITION JANUARY 4, 1869.

We are indebted to the Comptroller of the Currency for the following reports of the National Banks of each State and redemption city for the quarter ending the first Monday of January, 1869. As will be seen we have grouped them together in the following order:—First, the Eastern States, next the Middle States, then the Southern States, and last the Western States followed by the returns from the Territories. A separate table of the legal tender reserve held in the cities we gave last week.

[From our own Correspondent.]

LONDON, Saturday, January 30, 1869.

The delays which have so frequently taken place in our telegraphic communications with India have been seriously felt by our merchants, and at various times put an almost entire stop to business. The cable laid down a few years since in the Persian Gulf has been so frequently broken, causing so much uncertainty in the transmission of messages from Bombay or Calcutta to India, and vice versa, that measures have been adopted with the object of preventing any such inconvenience in future. A few months since, a company was brought out for constructing a line via Vienna and the South of Russia, joining the Persian Gulf line at the head of the Gulf. That line has, however, two great drawbacks: In the first place, the delays which have taken place have been on the Persian Gulf cable, while, secondly, so large a portion of the route is through foreign countries that, in the event of war, our communications with India would be immediately severed. Rapid communication with our Indian empire is so important that the necessity of laying down a more complete cable has for some time been perceived, and the great success of the Atlantic telegraphs has induced some of the gentlemen engaged in those undertakings, including others holding important positions, to revive the scheme via the Red Sea, notwithstanding that that route failed a few years since. The manufacture of submarine cables has, however, improved so greatly since the Red Sea line failed, hopes are entertained that the present line will prove a decided success. The directors of the new company, which is called the British-Indian Submarine Telegraph Company, limited, are Mr. John Pender, of Manchester, Chairman; Sir James Anderson, Managing Director; Baron Emile d'Erlanger; Lieut.-Colonel Glover, R. E., late Director General of Telegraphs in India; Lord William Hay, Chairman of the Anglo-American Telegraph Company; Mr. Thomas Dyson Hornby, Director of the British and Irish Magnetic Telegraph Company; Mr. Philip Rawson, and Sir Charles Wingfield, K.C.S.I., M.P., late Chief Commissioner of Oude. The line is, in fact, an extension of the Anglo-Mediterranean Telegraph Company, whose cable now extends to Alexandria, in Egypt. The new company has leased and possesses the power of purchasing the land lines belonging to the Telegraph to India Company, so that the line to be constructed and laid down will commence at Suez, touch at Aden, and then stretch across to Bombay. The capital of the company is large, viz.: £1,200,000, in 120,000 shares of £10 each; but as soon as the line is completed to Bombay, efforts will be made to extend it to Ceylon, and from Ceylon to Australia. The prospectus will shortly appear of the Indian and Australian Submarine Telegraph Company, so that if the last two companies meet with success, India can be reached by four routes.

In the money market there has been continued quietness, but the rates of discount have not materially changed. In consequence, however, of an increasing export demand for the precious metals, a slight increase of firmness has been apparent. The supply of money is still good; but there is some revival of fresh enterprise, and it is to be hoped that an absorption of our supplies of idle money will gradually take place. The following are the quotations for money, compared with those of last year:

	1868.	1869.	Per cent.	Per cent.
Bank minimum.....	2	3	4 months' bank bills 1½ @ 1½	2½ @ 2½
Open-market rates:			6 months' bank bills 1½ @ 1½	2½ @ 2½

3 months' bills.....	1½ @ 1½	2½ @ 2½		

On the Continent the money market has continued quiet. The alterations in prices have been unimportant. Annexed are the quotations at the leading cities:

In the rates of foreign exchange a downward movement has been apparent, and the export demand for gold has increased. The Indian exchanges are firmer, and at Bombay the rate for bank bills on London has been as high as 2s. 1-16d. the rupee. There has, consequently, been an improved inquiry for silver and the quotation has had an upward tendency. Dollars are in good demand for the China market. The following are the prices of bullion: Bar gold, 77s. 9d.; do fine, 77. 9½d.; do refinable, 78s.; Spanish doubloons, 76s. @ 77s.; South American doubloons, 74s. @ 74s. 6d.; United States gold coin, 76½ @ 77s.; fine bar silver, 60½s.; dore do, 61½s.; fine cake silver, 65½s.; Mexican dollars, 59½s.; five-franc pieces, 59½ @ 59½s. per ounce.

The Consol market has been rather dull towards the close of the week in consequence of the increasing demand for gold for export. During the earlier part of the week, however, the market was steady, and prices ruled firm. Annexed are the highest and lowest quotations on each day of the week:

Week ending Jan. 30	Monday.	Tuesday	Wed'y.	Thur.	Friday.	Sat.

United States Five-Twenty bonds have continued in demand for investment, and prices have ruled firm. Atlantic and Great Western Railway securities have realized higher prices, and Erie and Illinois Central Railway shares have ruled firm. The highest and lowest prices of the principal American securities on each day of the week are subjoined:

Letters from Frankfort state that a steady demand for investment prevailed for United States Five-Twenty bonds, and that prices ruled firm.

The following statement shows the present position of the Bank of England, compared with the state of its resources at this date since 1865. It also exhibits the *minimum* rate of discount, the price of Consols, wheat, middling Upland cotton, and No. 40 mule yarn at this date since 1865:

January is usually a slack month, but this year commercial affairs are certainly encouraging, and a probability exists that business will now steadily improve. The prosecutions of the directors of defunct companies continue, and so long as such is the case much caution is certain to be observed; but, on the other hand, one great cause which was checking the return of confidence, viz., the alleged warlike attitude of the Continental powers seems to have been removed, and the belief in a peaceful future is more generally entertained. Europe, however, is still in arms, and is ready for a fight, but the fact that not one of the Continental Powers was disposed to enhance the difficulties of the Turco-Greek question, has led to the conclusion that, notwithstanding the enormous preparations for war, there is no inclination in any quarter to run to such an extreme. With the exception of Greece, Europe has endeavored to preserve the peace, and has so far succeeded. It is undoubtedly to be ascribed to this cause that trade wears a more cheerful aspect, and it may be hoped that so long as an assurance is given that peace will not be broken, the mercantile men of Europe will devote their time and their capital to trading operations. It is some encouragement that the trade of this year has opened with a fair degree of animation. Some departments are rather buoyant, and, on the whole, a healthy tone prevails; but at the same time the banks and discount houses continue extremely cautious, and require good security before making advances. The demand for choice bills is very

active, and consequently the leading mercantile houses are able to get their bills discounted on very easy terms.

In the iron districts, business is still very active, and the upward movement in prices has continued to progress. This activity is due in a great measure to the extension of railway communications throughout the world. Russia has of late given out extensive orders for railway iron, and as soon as the navigation of the Baltic is reopened large shipments will be made. The importance of railway communications to Russia cannot be over-estimated. So vast a tract of territory necessarily requires an extensive network of railways in order to bring one portion of it into rapid communication with another. Besides which, the produce grown in the interior requires to be conveyed to the coast at a low charge, or else the Russian farmer is certain to be beaten by the farmers of other nations in which the railway system is more complete. With a proper development in this respect, however, farming in Russia can be carried on at a distance from navigable rivers, and hence the yield of the land will be increased. The facilities of communication will also in many ways lead to an increase of prosperity; the peasantry will visit the towns more frequently, will become inoculated with the customs and manners there observed; will find their wants augmented, and will be compelled to supply those wants by raising more produce from the land. With the growth in the production of the land, there will, of course, be an augmentation of wealth, and in due course the population will increase. Hence the development of the railway system will result in the more rapid development of Russia in wealth and strength. The wants of India, with regard to railway iron, are also very great, and extensive purchases have been made on that account. For the United States large transactions were entered into in the course of last year; but the demand is now greater.

The weather has become frosty, and the condition of the wheat brought forward for sale this week has materially improved. Farmers have not, however, thrashed out freely, and the supplies offered throughout the country have been somewhat restricted. Millers have purchased with more freedom, and the result has been that prices have improved 2s. per quarter. Barley is also rather dearer, and malting produce still commands a high price. The following is the statement of the imports and exports of wheat and flour for the season:

Letters from Manchester state that although prices remain firm on the whole, and producers act with considerable confidence and show little anxiety to sell, the market has been very quiet, and the tendency has been in favor of buyers. Just when there seemed to be a prospect of a demand springing up a few days since, the Liverpool market, which had been previously active, became suddenly quiet and dull, and the immediate consequence was that buyers withdrew or held back the offers which they contemplated making. There is, however, considerable confidence that something like present prices are tolerably safe, and that a trifling concession would bring buyers into the market. Flat news from Bombay to the 21st instant, and also dull advices from Calcutta and China, have added to the previous indispotion of shippers to these markets to give out orders, and the market suffers from the absence of demand in this department. Last week, like the present, commenced very quietly, but in the middle of the week a brisk demand for cotton sprang up. At the end of the week the cotton receipts proved to be larger than had been anticipated; and it was asserted, besides, that a large quantity of cotton which had been forwarded overland since the beginning of September had to be added to the stock, and the market became quieter in consequence. The action and necessities of speculators in cotton for future delivery, sometimes causing them to buy and sometimes to sell cotton which has been contracted for, have a capricious effect upon the value of the raw material.

#### English Market Reports—Per Cable.

The daily closing quotations in the markets of London and Liverpool for the past week, have been reported by submarine telegraph as shown in the following summary:

**London Money and Stock Market.**—Consols ruled steady at about 93½ for both money and the account, but toward the latter part of the

week the market weakened a little and prices close at  $\frac{1}{2}$  per cent concession. United States Five-Twenty have been firm and active and the quotation has advanced fully 1 per cent on the current rates of the previous week. Railway shares have ruled at better prices and close higher than last week. United States bonds at Frankfort have again advanced in sympathy with the London market, and close to-night at 80 $\frac{1}{2}$ .

**THE PATENT "ADDER."**—The Addometer, advertised in another column is an invention which will be appreciated by any one having to make laborious calculations. The agents in New York report that they are receiving orders already for the article to an extent which promises a fortune in it for any one prepared to buy the right and commence manufacturing.

**A NEW INVENTION.**—Attention is called to the advertisement of a "Patent Horse Hitch" in another column. It is claimed that it is the best thing of the kind in the market. As most all the territory is already sold, it is suggested that a speedy application will be necessary to secure the remainder.

**THE MONEY MARKET.**—The last bank statement showed no changes of importance. In the legal tenders there was a decrease of \$1,323,000, which indicated an efflux of currency from the city; while in the loans there was an increase of \$1,370,000; the other changes were nominal. The changes in the averages, though not important, were not calculated to encourage loaning operations.

The loan market presents no features of special interest. The supply of funds is well regulated with the demand, and the market being free from speculative interference, there is a healthy, steady feeling. Very little currency is coming from the interior, and the shipments to the South have been on a larger scale, some of the banks having sent as much as \$100,000 per day. This long continued flow of currency southward is a somewhat unusual movement, and is to be accounted for only on the supposition that while the South is realizing a large amount upon its cotton it is buying goods from the North very sparingly. The effect upon the money market is very evident; the legal-tenders in the banks are kept at a very low point, and the rate of interest ranges higher than is usual at this season. Should the South continue thus to hold an unusual amount of the currency sent for moving its crops the result may be a very active condition of the money market at the opening of the navigation season, when large amounts of produce will have to be forwarded to the seaboard.

On call loans the rate of interest is steady at 7 per cent on stock collaterals and 6 per cent on Governments. The discount market is well supplied with merchandise paper. The banks are taking their customers' paper liberally, but little beyond; on the street the most general rate for prime paper is 8@9 per cent, with light transactions on specialties at 7 per cent.

The following are the quotations for loans of various classes:

Call loans	Per cent.	Good endorsed bills, 3 & 4 months	Per cent.
Loans on bonds & mort.	7 @ 7	do single names	8 @ 9
Prime endorsed bills, 3 months	7 @ 8	Lower grades	9 @ 10
			12 @ 15

**UNITED STATES BONDS.**—The market for governments is less subject to the systematic efforts of dealers to depress prices, and bonds have shown an unusual activity and buoyancy. The shipments of bonds to Europe noted in our last have been followed by further consignments this week, making the total shipments within the last 14 days probably close upon \$5,000,000. Notwithstanding this additional supply to the foreign markets, the price of Fifties at London and Frankfurt has continued to advance, the quotation to-day at the former city being 77½ and at Frankfurt 80½@7. According to the advices of foreign bankers here, this improvement in the foreign markets is due to a *bona fide* investment demand, based upon an improved standing of the credit of our Government. The more conservative spirit lately shown in Congress, relative to the finances and to public expenditures and corporate subsidies, appears to be regarded as indicating a due regard for the interest of the public creditors and as the beginning of a reaction from an era of extravagance. Much confidence also appears to be felt in the administration of Gen. Grant proving moderate and conservative. It is to this change in opinion that the advance of our bonds to unprecedented figures in the European markets is attributable.

Prices here have sympathized very directly with this advance abroad, the market being now 1@2½ per cent higher than a week ago. The rise in prices does not appear to have brought on the market an amount of bonds equal to the shipments abroad, and some of the issues are scarce. There appears to be a very considerable amount of "short" contracts still outstanding, and hence bonds are in active borrowing demand, the following being the rates of interest paid on the currency advanced against the bonds loaned: Sixties, 5@6; Sixties-fours, 6; Sixties-fives, old, "flat" to 2; Sixties-fives, new, 5@6; Sixties-sevens, 4; Ten-forties, 4@5; United States Bonds to Pacific Railroad, 4.

The probability of Congress adopting the bill forbidding any further issues of bonds, beyond the small amount yet unissued against the retired Seven-thirties, and requiring those bonds to be disposed of by public tender, whenever sold, has had a salutary effect on the market, adapted as it is to avert sudden fluctuations through unexpected secret sales of securities.

The following are the closing prices of leading government securities, compared with preceding weeks:

**RAILROAD AND MISCELLANEOUS STOCKS.**—The excitement in the stock market has abated, and present symptoms indicate the probability of a more or less protracted dullness. The occurrence of legislative obstructions, raised in other States, to the completion of the Erie combination of roads has thrown a certain degree of doubt on the ultimate success of the through route schemes; which, for the moment, produces a disinclination to hold the stocks included in the Erie programme. The stocks, however, are firmly held by parties connected with the promoters of the schemes; so firmly, indeed, that as yet no parties have been found willing to seize the occasion for forcing down these specialties. Under this condition of affairs the market is kept constantly sensitive, any rise or fall being regarded as possibly indicating some new turn in affairs.

The stocks under the control of the Vanderbilt party have been on the whole strong, excepting New York Central, which is kept in uncertainty by the difference in opinion as to the legal standing of the dividend certificates recently issued. The certificates are now being issued on the stock excepted pending the injunction obtained under the Jencks' suit. It is intimated that the Directors contemplate offering convertible bonds in exchange for the certificates as an indirect way of converting the scrip into stock.

There has been some foreign demand for railroad stocks and bonds. A large amount of the bonds of the Central Pacific Railroad has been sold for shipment, and that loan is now closed. Negotiations also are understood to be pending for the sale of a

large portion of a large portion of the 7 per cent gold bonds of the Rockford, Rock Island and St. Louis Railroad Company to a European banking house. Further shipments of the preferred shares of the Chicago and Northwestern Railroad have been made; and we hear of moderate amounts of other stocks being sent abroad.

The transactions of the week have been quite moderate, and prices do not vary materially from our last quotations:

The following were the closing quotations at the regular board compared with those of the six preceding weeks:

**THE GOLD MARKET.**—Gold continues weak, the price having at one time, touched 134 1/2, but again reacting to 135 1/2 and closing at 135 1/2. The large shipments of United States and other bonds and of various railroad stocks has made exchange very abundant; so that at a period when we are usually making good the deficiency in our trade balance by shipments of specie, we have exchange 1/2 per cent below the specie shipping rate. This fact, together with the remarkable firmness of United States bonds abroad, has encouraged an active selling movement. Certain strong operators, however, regard this course of our foreign exchanges as only temporary, and therefore take large blocks of gold, with a view to controlling the market when the period comes that specie must be sent out. The large amount of coin held by these parties produces a good deal of uneasiness among "short" sellers, lest they should some day find gold disappearing from the market and the borrowing rate advanced to exorbitant figures. Loans have been made from "flat" to 7 per cent "for borrowing."

The fluctuations in the gold market, and the business at the Gold Board during the week closing with Friday, are shown in the following table:

## The Commercial Times.

## COMMERCIAL EPITOME.

FRIDAY NIGHT, Feb. 12.

There is more complaint of a dull, unremunerative state of trade than we have heard in several weeks before. This may be mainly accounted for the fact to which we alluded last week, namely, the culmination of speculation in many leading staples, leaving the movement in them subject to such demand as may exist under weak and declining prices. And yet confidence is very general in a good business during the coming Spring, although it is not probable that we shall see so much speculation as we have had in the past two months.

Cotton closes dull and heavy. Breadstuffs have been doing a little better, but close quiet. Groceries have been marked by a large advance in Sugar, based on the Cuba troubles; and other articles are firm. Tobacco has been fairly active, mainly for home use, with some speculation.

Hides and leather have had an upward tendency, but no substantial advance can be quoted. Hops have been in moderate speculative demand. Hay is more steady. Whiskey is firmer on the closing of the city distilleries. Tallow has been quiet, and closes weak.

Petroleum took an upward turn, contemporary with our last, and a small advance was realized and maintained. Oils are without essential change. Naval stores have been doing rather better, but close quiet.

East India goods are very quiet. Metals are inactive, and prices without essential variation. Wool has remained quiet.

Freights have been but moderately active, and rates close very unsettled to the leading British ports. Charters to Cork, for orders, with grain, have been at 6s per quarter.

The market for hog products is extremely dull, and values very uncertain, though whatever advantages may exist are naturally in buyers' favor. Holders, with a few exceptions, appear to retain enough confidence to prevent any great pressure, while buyers, having but little use for goods, and encouraged by the apparent weakness, are disposed to take all the chances of a further modification in rates. In fact, the position is just that peculiar one where a very small matter would place either the buyer or seller in the ascendancy, and both sides await further developments.

Beef has been firm, and fairly active, while Butter and Cheese are doing better.

## COTTON.

FRIDAY, P. M., February 12, 1869.

By special telegrams received by us to-night from each of the Southern ports we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Feb. 12. From the figures thus obtained, it appears that the total receipts for the seven days have reached 70,529 bales, (against 67,865 bales last week, 86,517 bales the previous week, and 82,374 bales three weeks since,) making the aggregate receipts since September 1, 1868 up to this date, 1,737,088 bales, against 1,553,418 bales for the same period in 1867, being an excess this season over last season of 183,670 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1867 are as follows:

Received this week at—	1869.	1868.	Received this week at—	1869.	1868.
New Orleans	23,693	33,378	Florida	419	587
Mobile	8,646	12,460	North Carolina	1,030	1,683
Charleston	5,732	5,729	Virginia	6,832	5,245
Savannah	18,146	21,866	Total receipts	70,529	94,159
Texas	3,764	4,100	Decrease this year	23,630	
Tennessee, &c	7,394	5,841			

The exports for the week ending this evening reach a total of 38,006 bales, of which 30,953 were to Great Britain, and 7,053 bales to the Continent, while the stocks at all the ports as made up this evening, are now 407,669 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us by our own correspondents at the various ports to-night:

Week ending	Exported to—	Total Same week	Stock—
Feb. 12.	Gt Britain. Cont'n't.	this week.	1868.
New Orleans	13,448	6,543	23,991

Total	30,953	7,053	65,060
Total since Sept. 1.	453,942	281,451	735,293

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 27,054 bales, while the stocks to-night are 40,076 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports since Sept. 1, according to the latest mail returns. We do not include our telegrams to-night, as

we cannot insure the accuracy or obtain the detail necessary, by telegraph:

\* Under this head we have added the overland shipments direct to manufacturers to January 1.

The market this week has been without any feature of particular interest. On Saturday there was renewed activity, and prices rose  $\frac{1}{2}$  c. over the close of Friday night; but on Monday the improvement was lost, the demand being very limited and the reports from Liverpool less favorable. Since then, with better accounts by Cable, and small receipts at the ports, the market has been firm, and prices have improved a little, with offerings large, but holders demanding full prices until to-day, when, under the influence of the favorable stock account from Liverpool, the market became dull and heavy and so closes to-night, with prices  $\frac{1}{2}$  @  $\frac{1}{4}$  c. off. Sales for forward delivery have been at full figures, and reach a total of 3,500 bales for the week, of which 100 bales Low Middling were sold Saturday at 29 $\frac{1}{2}$  c. for February and March, and 100 bales for April and May at 29 $\frac{1}{2}$  c.; on Monday, 500 bales for February and March were reported at 30c; 400 bales for April at 29 $\frac{1}{2}$  c., and 200 bales for April and May at 29 $\frac{1}{2}$  c.; on Tuesday, 200 bales for March at 30c., and the same amount on private terms; Wednesday, 500 bales for April at 29 $\frac{1}{2}$  c.; Thursday, 500 bales for April at 29 $\frac{1}{2}$  c., and 200 bales for March at 29 $\frac{1}{2}$  c.; to-day, 300 bales Low Middling are reported at 30c., and another lot of same amount at 29 $\frac{1}{2}$  c.—all for March. For immediate delivery the total sales of the week foot up 28,398 bales (including 710 bales to arrive), of which 4,499 bales were taken by spinners, 10,852 bales on speculation, 7,533 bales for export, 5,514 in transit, and the following are the closing quotations:

TRANSIT COTTON.—Early in the week there was an active demand for transit cotton, but for the last two days there have been no transactions. Sales were on the basis 29 $\frac{1}{2}$  c. for Middling Orleans, freight  $\frac{1}{2}$  d, insurance 2 $\frac{1}{2}$  per cent; New Orleans to Liverpool, one-third Low Middling and two thirds Middling at 28 $\frac{1}{2}$  c,  $\frac{1}{2}$  d freight, 2 $\frac{1}{2}$  per cent insurance; Galveston to Liverpool, average Low Middling 29c,  $\frac{1}{2}$  d freight; Mobile to Liverpool, good ordinary 28 $\frac{1}{2}$  c,  $\frac{1}{2}$  d freight, 2 $\frac{1}{2}$  per cent insurance. The total transit sales of the week have reached 5,574, principally for speculation.

RECEIPTS.—The receipts this week are again disappointing to the majority of the trade. There has been much discussion as to the reason for the sudden decrease of the last two weeks. To the short crop men it is only evidence of the correctness of their theories; but to all others (and they are by far the more numerous class), it is attributed to special causes. Our mail advices from New Orleans of February 6, state that the rains have been so heavy that the roads at some points are almost impassable, preventing cotton from being hauled to the landings. In this fact certainly is a cause which may have kept back many thousand bales at that port alone, since the first of the month. We hear also of very bad roads in Texas, in Georgia, and in portions of Alabama and South Carolina. Our latest mail advices from Galveston speak of the roads as "almost impassable" in that section, while the *Commercial Bulletin* of that city says "large numbers of wagons have been obliged to come to a complete standstill awaiting the drying off of the water with which the prairies are

covered." Then again, at some of the upcountry markets, prices are higher than at the outports, being sustained by local speculation; so that, although the receipts at the interior ports are in excess of last year, the amount sent forward is less. This we are informed is particularly true of the Atlantic States, and is affecting seriously the arrivals at Savannah. These facts are thought to furnish a full explanation of the falling off in the receipts. But besides all this, there is another cause which it is claimed is operating with more or less force. Speculators it is said have gone into the interior and are buying cotton on the plantations, so as to prevent its coming to market at present, believing the Liverpool price can be run up much higher if the receipts can be kept small, and the idea of a short crop become prevalent. We do not know to what extent this is being done, or how far it is retarding the free movement of the crop; we give the statement as talked about here. Certainly it is an idea easy to believe, for never was there more confidence felt in cotton among holders than for the past few weeks.

**OVERLAND SHIPMENT.**—We had intended this week to add to our table of receipts the corrections for overland shipments direct to manu- facturers during January—some of our reports have failed to reach us and others are not as full as we could wish—we shall, therefore, omit it this month. It may be of interest to our readers to learn that the movement has not been as free as during November and December, and the mills to-day are not as well stocked as on the first of January. On an average, those of New York, Rhode Island and Connecticut have not more than four or five weeks supply; but some of the larger of the Massachusetts mills are very well stocked, two of them having a supply it to next September. There is a movement now for a small reduction of time among about a dozen of the leading companies. This is due to the fact that some of the heavier makes of goods are, as we understand, not profitable at present prices. It is not likely that this will lead to any general movement.

The exports of cotton this week from New York show a small increase, the total reaching 6,026 bales, against 2,693 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last three weeks; also the total exports and direction since September 1, 1868; and in the last column the total for the same period of the previous year:

**EUROPEAN AND INDIAN COTTON MARKETS.**—In reference to these markets, our correspondent in London, writing under the date of Jan. 30 states:

LIVERPOOL, Jan. 30.—The value of cotton has slightly declined in the course of the week. During the earlier part prices gave way ½d. per lb., but a portion of that fall has since been recovered. At the close of the week the only change of importance since Saturday last is a fall of ½d in American produce. The total sales of the week amount to 77,390 bales, of which 18,980 bales are on speculation, 11,940 bales declared for export, leaving 46,470 bales to the trade. In cotton to arrive transactions continue large, particularly in American; the latest

Of the present stock of cotton in Liverpool 21 per cent is American, against 37 per cent last year. Of Indian cotton the proportion is 49 per cent, against 37 per cent.

London, January 30.—There was a good demand for cotton during the early part of the week, but it has since subsided, and the market is now quiet. The following are the particulars of imports, deliveries and stocks:

BOMBAY, Jan. 15.—The arrival of new Oomrawuttee are now considerable and the demand active. Of new Broach there is very little yet in market, and of new Dhollerah none. Of Broach and of old Dhollerah the arrivals are small. The market is strong and advancing. We quote new Oomrawuttee 9 5-16d, cost and freight; old 8 9-16d; new Broach 9 9-16d; old Dhollerah 8 9-16d. The sales since 1st inst. amount to 25,000 bales, and the clearances to 14,500 bales, against 37,700 bales for the same fortnight last year. The quantity entered outwards is 80,250 bales, against 63,000 last year. Crop accounts better.

## TOBACCO.

FRIDAY, P. M., February 12, 1869.

There is a decrease in the exports of crude tobacco this week, the total at all the ports reaching 429 hhds., 817

cases and 375 bales, against 819 hhds., 814 cases, 233 bales and 45 tcs. for the previous seven days. Of these exports for this week, 428 hhds., 723 cases and 315 bales were from New York; 1 hhd., 1 case and 13 bales from Boston. The direction of the shipments of hhds. was as follows: 18 to Liverpool, 46 to Bremen, 339 to Gibraltar and Malaga, and the balance to different ports. During the same period the exports of manufactured tobacco reached 77,873 lbs., of which 36,695 were to Liverpool. The full particulars of the week's shipments from all the ports were as follows:

The market has been moderately active and firm for all kinds. The home demand has been more pressing than the export orders.

Kentucky Leaf has been in request for cutting, and the sales for the week foot up 350 hhds., of which only a few small lots for export. Prices have ranged from 8 to 16c, and very firm.

Seed Leaf has been in good demand, partly speculative, and all the good lots of Ohio arriving are quickly taken up for export. The sales are 40 cases new Pennsylvania, private terms; 166 cases Ohio, crop of 1867, 12c; 37 do, private terms; 57 cases Connecticut, crop of 1867, 36c; 57 cases Connecticut, crop of 1866, 13c; 107 cases Ohio, 12c; 50 cases Ohio, private terms; and 241 cases old Ohio, including the 166 cases noted above, re-sold on private terms.

Spanish Tobacco has been more active for home use; sales include 500 bales Yara, to go West, at 64@65c, gold, duty paid; 250 bales Havana, 88@105c.

Manufactured Tobacco remains quiet. There is as yet no accumulation of stocks sufficient to attract buyers.

The following are the exports of tobacco from New York for the past week:

From New Orleans—To Nassau, 47 bales.  
From San Francisco—To Callao, 92 cases. To Honolulu, 1 case.  
From Philadelphia—To Barbadoes, 10,432 lbs manufactured.

## BREADSTUFFS.

FRIDAY, Feb. 12, 1869, P. M.

The market generally has taken a more favorable turn to holders. There has been, during the past week, a pretty general improvement in prices, with an increased business.

The receipts of flour have continued very small, and, notwithstanding the reduced demand for some weeks past, the stocks in store have been steadily diminishing, while the persistency with which the trade has refrained from purchasing, has left very small stocks in dealers' hands. They have, consequently, come into market the past week, and some large lines have been disposed of. They have taken principally of the medium and better grades, in which there has been some recovery from the prices lately current. The low grades being neglected, and with but little export demand, experienced more decline, but are rather better at the close.

Wheat has been more active, both for export and milling, with some speculation, and prices of Spring growths are 2@3c better on the week. But, notwithstanding the rapid reduction in the stocks of Spring Wheat, holders have been free sellers at each advance, and to-day there was a liberal show of samples at \$1 61@1 65 for No. 2 in store and afloat. Winter Wheats have been dull, and California not saleable over \$2 per bushel. The dullness and liberal supply of Winter Wheats are the chief obstacles to an advance in Spring Wheats. Receipts at Lake ports are smaller, and No. 2 Spring has advanced in Chicago to \$1 17½.

Corn having declined to 90c for prime new and \$1 for prime old Western Mixed, some speculation set in, attended with an advance of 4c in prices of both descriptions. Receipts continue light, and stocks diminishing, with a fair trade; but the advance has shut out export orders, and the close is dull.

Rye has been moderately active and firm. Oats have been rather firm, in sympathy with Corn, and some speculation, but trade is very moderate, and the close flat. Barley has been active and firmer, several parcels of German having sold at \$2 22½@2 30, part to arrive. Canada West has brought \$2 15@2 18, and State quoted at \$2 00@2 05. Barley Malt has a steady sale. Canada Peas remain entirely nominal.

## GROCERIES.

FRIDAY EVENING, February 12, 1869.

The all-important feature of the market has been the remarkable advance in prices and the large sales of sugar. The fluctuations and excitement in this branch of the trade have been such as could hardly be caused by any influence less powerful than a serious political disturbance such as that now prevailing in the Island of Cuba.

There has been no movement in molasses at all corresponding to that in sugar; on the contrary, business has been dull, though prices at the close are quite firm.

In tea there has been but a limited trade, mostly in greens. Rio Coffee has been held almost too firmly to admit of heavy sales; transactions have been of fair amounts, however.

Gold has been weak, and shows no sign of immediate advance, though we incline to the opinion, previously expressed, that the premium will probably be higher within the next few months.

Imports of the week have been only moderate; included

in them were three cargoes of tea (one of these at Boston,) four cargoes of Rio Coffee, and an average quantity of Sugar of West India product, besides 38,855 bags of Brazil and Manila. Under these limited receipts stocks have been reduced, with the usual effect of strengthening the market. Full details of the imports at New York for the week, and at the several ports since January 1, are given below under the respective heads. The totals are as follows:

## TEA.

There has been but a moderate business done during the past week. The inquiry has been principally for Greens; Blacks have been but little asked for, though we notice a sale at the close of 2,100 half chests of Souchong. Prices have been well supported. The new crop teas hitherto received have somewhat disappointed the trade in their quality, so far proving inferior in quality to the last crop. Sales comprise 11,445 half chests Greens, 2,600 do Souchongs and 2,472 do Japan.

Imports of tea for the week include two cargoes at this port and one at Boston, of which the details are as follows: "Resolute," from Shanghai, 17,067 lbs Congou and Souchong, 35,273 do Twankay, 1,600 do Hyson Skin, 22,24 do Hyson, 351,168 do Young Hyson, 87,047 do Imperial, 156,515 do Gunpowder, 27,141 do Japans. "Game Cock," from Whampoa, 179,06 lbs Congou, &c., 64,500 do Pouchong, 88,727 do Oolong, 18,006 do Hyson skin, 14,208 do Hyson, 82,199 do Young Hyson, 63,993 do Gunpowder. At Boston the "Hoogly," from Tootchow, brings 273 451 lbs Congou, &c., and 195,065 do of Oolong.

The following table shows the shipments of Tea from China and Japan to the United States from June 1, 1868, to Nov. 30, the date of latest advices by mail; and importations into the United States (not including San Francisco), from Jan. 1 to date, in 1868 and 1869.

## COFFEE.

The prices for Rio and Santos Coffee have been firmly sustained, importers' views being, if anything, too firm for the promotion of an active business. The business of the week, though not remarkable for amount, still foots up a fair total.

In other descriptions, except a single sale of 1,500 bags, of Java only a few small lots have been disposed of, but these have been placed at steady rates, and the general tone of the market has been one of increasing strength. The sales are 18,911 bags of Rio, 2,500 do. Java, 520 do. Laguayra, 321 do. St. Domingo, 100 do. Costa Rica, and 8 do. Coro.

Imports Rio for the week include the following cargoes: "Bessie," (Santos), 3,000 bags; "Invergne," 4,000; "Pilgrim," 3,230 do. "Wavelet," 4,211. At New Orleans, "Yaymoydin," 7,881 bags; "Dolphin," 4,020 do. At Galveston, "Leopoldine," 2,600 bags. At Baltimore, "Traveller," 4,000 bags; "Lapwing," 4,671 do.

Of other sorts the arrivals include two cargoes of St. Domingo, amounting to 9,105 bags, and 60 bags of Jamaica.

## SUGAR.

The present week has witnessed a very unusual and in itself

remarkable excitement in this market. Influenced by the news of the insurrection in Cuba, holders have raised prices with great rapidity, followed as rapidly by speculative buyers, and within the last two days large amounts have changed hands at rates marked by an advance in refining sugars of  $\frac{1}{2}$  cent per lb. during the course of a single day's business, and fully  $\frac{1}{4}$  cent since the close of our last report. Refiners have purchased some at even the highest figures, but generally only so far as they were compelled to by their wants. The course of the market it would be difficult to foretell. Sales include 7,803 hhds. Cuba, 637 do Porto Rico, 101 do Barbadoes, 28 do Demerara, 140 do New Orleans, 30 do Melado, 62,697 bags Manila, 5,000 do Pernambuco 4,248 do Bahia, and 13,451 boxes Havana.

The imports of the week at New York have been as follows: 1,958 boxes and 2,433 hhds. of Cuba, 187 hhds. of Demerara, 25,544 bags of Manila and 13,311 bags of Brazil.

The stocks at New York Feb. 11, and imports at all the ports since Jan. 1, are as follows:

## MOLASSES.

There has been scarcely any sympathy in this market with the extraordinary excitement prevalent in Sugars, with foreign and domestic Molasses remaining almost stationary in price. Towards the close there has been some improvement noticeable in the tone of the market for foreign. The views of holders necessarily receive strength from the course of Sugars, and they are indifferent as to selling at the present rates. Sales foot up 1,087 hhds Cuba, 454 do Demerara, 10 do Nuevitas, and 650 bbls New Orleans.

The receipts of the week at New York have included 2,557 hhds of Cuba, 327 hhd. Demerara, and 1,724 bbls. of New Orleans.

## SPICES.

There has been the usual steady trade to jobbers. Prices are generally fully supported, and we remark a little more firmness in Singapore Pepper, which has been selling freely for the last day or two at 24 cents, a figure not before reached during the present season.

## FRUITS.

In Foreign dried the market has been dull generally, and prices in one or two instances have deteriorated; in the main, however, our quotations require no reduction, and in Turkish Prunes we are able to note an improvement. The demand for these continues very good. Both West Indian and Mediterranean Green Fruits are in light supply and some of the arrivals of the former during the early part of the week were in very poor condition, reducing the available stock here to a considerable extent. Fresh receipts are expected shortly, and prices are without much alteration. In Domestic dried there has been a fair trade, Southern dried apples selling freely and at better prices. We note a sale in the latter of a very fine lot at 12@13 cents, an unusual figure.

## THE DRY GOODS TRADE.

FRIDAY, P. M., February 12, 1869.

There has not been any extraordinary activity in the market during the week among commission merchants and in the jobbing houses, while the number of purchasers has been on the increase, they have, as yet, hardly taken hold with much eagerness. Prices remain firm, without a sign of any concession on the part of holders, and it is probable that buyers, who have come to the city to stock up, will soon commence to purchase in earnest, relinquishing the idea that goods will be lower within a short time. Manu-

facturers claim, with apparent reason, that goods cannot be manufactured—with cotton at 30 cents a pound—and sold at any lower prices than those now current. And, although some of the leading mills of the country are stocked up with cotton, for several months to come the standard for the price of goods will still be, the cost of manufacturing at the prices for the raw material current at the present time.

There is much now said upon the market as to the large proportion of Southern buyers in the city; and we hail with satisfaction, the arrival again in the New York market of purchasers from the South, who formerly constituted so large and liberal a class of the country merchants who traded with our jobbers.

The exports of dry goods for the past week, and since January 1, 1868, and the total for the same time in 1867 and 1860 are shown in the following table:

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of the leading jobbers:

**BROWN SHEETINGS AND SHIRTINGS** show but little change. The demand has been light. Prices are firmly sustained, and no disposition is manifested to press sales; but, on the contrary, a feeling prevails among the holders of stock that an advance must soon take place if cotton remains at its present figures. We quote: Agawam 36 inches 13½, Amoskeag A 36 16½, do B 36 16½, Atlantic A 36 17, do H 36 16½, do P 36 14, do L 36 14½, do V 33 14½, Appleton A 33 17, Augusta 36 15½, do 30 13½, Bedford R 30 10½, Boott H 27 11½, do O 34 12½, do S 40 14½, do W 45 18, Commonwealth O 27 8½, Grafton A 27 9½, Great Falls M 36 14, do S 33 13, Indian Head 36 17, do 30 14½, Indian Orchard A 40 15, do C 36 14, do BB 36 13, do W 34 12, do NN 36 15, Laconia O 39 15, do B 37 14½, do E 36 14, Lawrence C 36 16½, do E 36 15, do F 36 14, do G 34 13, do H 27 12, do LL 36 14, Lyman C 36 15, do E 36 17, Massachusetts BB 36 14½, do J 30 13, Medford 36 16, Nashua fine 33 15, do 36 16½, do E 39 17½, Newmarket A 14, Pacific extra 36 16½, do H 36 16½, do L 36 14½, Pepperell 6-4 30, do 7-4 32½, do 8-4 42½, do 9-4 47½, do 10-4 52½, do 11-4 57½, Pepperell E fine 39 15½, do R 36 14½, do O 33 13½, do N 30 12½, do G 30 13½, Pocasset F 30 11½, do K 36 13½, do 40 16, Saranac fine O 33 14½, do R 36 16, do E 39 17, Sigourney 36 10½, Stark A 36 16½, Swift River 36 12½, Tiger 27 9½, Tremont M 33 11½.

**BLEACHED SHEETINGS AND SHIRTINGS.**—There has been only a moderate demand for these goods, but sufficient to prevent an accumulation of stock either in first or second hands. The market closes firm. Manufacturers appear to show no uneasiness, but are waiting the usual spring demand, which must be near at hand. We quote: Amoskeag 46 19, do 42 18, do A 36 16½, Androscoggin 36 18, Appleton 36 18, Attawaugan XX 36 15½, Atlantic Cambric 36 26, Ballou & Son 36 15, do 33 13, Bartlett's 36 16½, do 33 15½, do 30 14½, Bates 36 20, do B 33 15, Blackstone 36 15½, do D 36 14 Boott B 36 15½, do C 33 14½, do E 35 14, do H 28 11½, do O 30 13, do R 27 11, do L 36 15½, do W 45 18, Dwight 36 25, Ellerton E 42 20, do 27 10, Forrest Mills 36 15, Forestdale 36 17, Globe 27 8½, Fruit of the Loom 36 19, Gold Medal 36 15½, Greene Mfg Co 36 18, do 30 11½, Great Falls K 36 16, do M 33 14½, do S 31 12½, do A 33 15, Hill's Seamp. **BROWN DRILLS** are quiet but firm. Prices remain unchanged. Amoskeag 17½, Boott 17½, Graniteville D 17, Laconia 17½, Pepperell 18, Stark A 17½, do H 15½.

**PRINTS** have been in fair demand; but as printers have been running on short time, there is no accumulation in agents' hands, and prices are well maintained for good styles. As long as print cloths bring 9 to 9½ cents, prints cannot be made to sell at a profit for anything less than 13½ cents for full madders on standard cloths. We have little change to make in our quotations, as prices are for the present in statu quo. The "drives" offered by a leading jobber in prints have had no effect as yet in weakening the market for other first class work. Interior merchants are ordering more freely of general stock to sort up with before purchasing full spring supplies. We anticipate a more active market for prints by another week. Allens 13½, American Star 7½, Amoskeag 13½, Arnolds 11½-12, Coheco 14, Conestoga 13-13½, Dunsell's 14, Freeman 11½, Gloucester 13½, Hamilton 13 14, Home 8½, Lancaster 12½-13, London mourning 13, Mallory 13½, Manchester 15½, Merrimac D 14½, do pink and purple 15, do W 16, Oriental 13, Pacific 13½, Richmond's 13½, Simpson Mourning 13, Sprague's purple and pink 14½, do blue and white 15, do fancy 13½-14½, do shirtings 15½, Victory 12, Wamsutta 10½, Wauregan 13.

**GINGHAMS.**—The demand for ginghams is light, but is probably as

large as can be expected at this season of the year. Prices of the best makes are firmly maintained. Allamance plaid 18, Caledonia 14½, Glasgow 16, Hampden 16½, Lancaster 17, Manchester 18½.

**MUSLIN DELAINES.**—There is a moderate business doing. It is too early in the season for a general display of spring styles. A few light effects are offered by some of our jobbers, but we do not look for much activity in these goods till next month. Pacific Armures 21, do Alpaca 3-4 plain 25, 6-4 27½, Pekins 25, Orientale 20.

**TICKINGS** continue in moderate demand. Prices are not quotably higher; but the market has a decidedly upward tendency. Albany 11, American 14½, Amoskeag A C A 35, do A 30, do B 25, do C 22, do D 20, Blackstone River 17, Conestoga 26, do extra 31, Cordis 31, do BB 17, Hamilton 26, do D 21, Lewiston 35 32½, do 32 29, do 30 28, Mees. and Wm's 29, Pearl River 31, Pemberton AA 26, do E 18 Swift River 17½, Thordike 17, Whittenton A 22½, Willow Brook 30, York 30 26, do 32 32½.

**STRIPES** are selling in small lots to complete assortments. Last week's prices are readily obtained. Albany 11, American 14½, Amoskeag 22-23, Boston 15, Everett 13½, Hamilton 22½, Haymaker 16, Sheridan A 14, do G 14½, Uncasville dark 16½, do light 15½, Whittenton AA 23, do A 20, do B 17, do C 15, York 22½.

**CHECKS.**—We make no change in our quotations. There is a fair stock offering, and prices are considered low compared with other goods. Caledonia No. 70 26, do 50 25, do 10 25, do 8 19, do 11 22½, do 15 27½, Kennebeck 25, Lanark No. 2 13, Park No. 60 15, do 70 20, do 90 27½, Pequa No 1,200 14½, Star Mills 600 —, do 800 16, Union No 20 25, do 50 27½.

**DETNIS** are in better demand this week than last, and stocks have been considerably reduced. Prices are tending upward, especially for the better grades. Amoskeag 31, Blue Hill 15, Beaver Cr. blue 27½, do CC 18½, Columbian extra 29, Haymaker 18½, Manchester 20, Otis AXA 27½, do BB 25, do CC 21, Pearl River 30, Thordike 19, Tremont 20.

**CORSET JEANS** are firmly held at last week's prices. The demand for these goods has been so large this season that the agents report that they are sold ahead for several weeks. Amoskeag 15½, Andro coggin 17, Bates 12½, Everetts 16, Indian Orch. Imp. 14, Laconia 15½, Lewiston —, Naumkeag 15½, Newmarket 14, Washington satteen 17.

**COTTON BAGS** are scarce in jobbers hands, and as outside lots, which have been selling under agents prices, are cleared from the market, agents are obtaining full rates. We hear of some large sales to Western jobbers at our quotations. Amoskeag 42½, American 45, Androscoggin 45, Lewiston 45, Stark A 47½.

**COTTON YARN AND WARP** are in light supply, and prices very firm. With a more active demand prices must advance. Best Georgia cotton yarns Nos 6 to 12 41, Flag warp 4 ply 45, 4 ply cotton twine good 41, extra fine do 42½, extra finished 2 ply 46 25.

**CAMBRICS**—Both rolled and flat cambrics are very firm, and with light stocks prices are tending upward. Spool cotton is now selling at a loss to the manufacturers. We quote best 6 cord 90c, 3 cord at 42½c.

**CARPETS**—There has been more doing this week than any previous week this year. The demand mostly coming from the West, opening prices are well maintained, and we would not be surprised to see an advance on some makes which we a told are selling at a loss to the manufacturer.

**WOOLENS** are generally firm, but the demand is not very active at present. There is a moderate demand for cloths from the clothing houses, who a e making up for the spring trade. The stock of fancy cassimeres on the market is smaller than it has been before in a number of years. Jobbers are beginning to lay in stock, and prices are firm.

**FOREIGN DRESS GOODS** are still inactive. We note sales of English Mozambique at 27½. The complete revolution in foreign manufactured goods which the Atlantic telegraph cable has brought about is being felt, supply and demand being equalized, and the flooding of the market to a great extent prevented. The city and near-by trade are buying a few silks and muslins for the early spring demand, but the heavier buyers are holding off till the auction sales fairly commence. The heavy importations of January tend to weaken the views of buyers.

The auction rooms have not yet offered any special attractions; but their sales, though comparatively small, have been well attended, and the prices have been generally satisfactory.

### RELEASE & SAFETY HORSE HITCH

Is the best thing of the kind ever invented. It is simple, can be manufactured for a few cents, can be operated with a single motion of the hand on the darkest night, and obviates all the trouble of tying knots and the (usually) still greater trouble of UNTYING them. They are being manufactured on a large scale and sell rapidly. Nearly all the territory is now disposed of and is paying well for the investment. New York State, with the exception of a few counties already sold, is now offered at a reasonable figure. For further information apply to

**ROBERTS & CO., 15 Wall street.**

## "ADDOMETER."

This instrument for mechanical addition is the latest invention of the kind, having just been patented, and is a great improvement upon any other instrument in the market. There is no doubt but they will be used in the future to the same extent that watches are now and it is quite within the range of probability that one million can be sold within the next ten years. They are simple, any one can readily understand how to use them; they are cheap, costing about one dollar apiece. They are small and weigh about as much as a watch. And the calculations of an hour can be compressed into a few minutes. The right for the United States can be bought for \$11,000, subject to certain reservations, and further information can be obtained

### REFERENCE BOOK.

The object of this book, as its name implies, is to afford an easy and ready reference in deciding credits. By consulting it the reader may discover at a glance the two most important elements in the claims of every applicant for credit—first, an indication of Capital; and second, the Comparative Credit Standing of the party in the community where he resides.

But while this work is prepared with the most scrupulous care, we are at all times conscious that it inadequately represents the material behind it. Notwithstanding the labor and the great expense which the solid mass of names in slate type implies, the work is only a secondary part of our business; and useful as it may be, is only an indication of the facilities we can afford our subscribers in aiding them to safely dispense credit. THE REFERENCE BOOK is merely an outgrowth of a large and comprehensive system inaugurated and tested by us and our immediate predecessors years before any such publication was dreamed of—a system which has for its basis a statement of all the facts and details gleaned from the best sources of information, which, year by year, as they accumulate, make up the HISTORY of every business man in the country. The accuracy of these details is alike tested and vouched for by their constant use as a basis for credit by the large number of subscribers whose confidence we have enjoyed for a period now extending over a quarter of a century. It is obvious, that with these current histories of all applicants for credit accessible, the merchant who neglects to avail himself of them, and contents himself in the granting of even a single credit with the mere Rating of a Book, does himself very great injustice. He doubles the ordinary risks of credit by leaning upon a meagre and at the best incomplete guide.

We have referred to the matter in the above manner because we notice a dangerous tendency among dispensers of credit (even among our more recent subscribers) to rely purely on the Reference Book. We urge upon them the desirability—nay, the absolute necessity, if they seek to trade safely—to consult the detailed Reports on Record at our various offices. We are certain, from long experience, that they will be amply repaid for the slight labor which such a habit will cause, and convinced that by neglecting to do so they are constantly doing themselves an injustice, increasing the already great risks of credit, and rendering inoperative the extended facilities which we propose to serve them.

The New Book, issued January 1, is the largest and most complete ever issued; is corrected up to within a very short date of publication, and we are sure will meet with the approval of our patrons.

**BOSTON, HARTFORD AND ERIE RAILROAD.**—It is announced from New England that the Boston, Hartford and Erie Company have leased the Norwich and Worcester road for ninety-nine years. The bargain has been concluded by the stockholders on both sides. The Norwich stock is to receive 10 per cent a year, net. The Boston and Erie Company have also arranged with the New London Northern road, by which a through line between New York and Boston is to be insured, without change of cars or the use of the present Shore Line Ferry at the Connecticut River, after July next, by which time the river will be bridged.

**WESTERN RAILROAD CONSOLIDATIONS.**—The Cincinnati Gazette, in an article reviewing the recent railroad consolidations, says:

The New York Central is interested in two routes direct to St. Louis from Lake Erie. The first from Cleveland, via Belle Plaine and Indianapolis, and the second via Toledo and Springfield. The second route is complete and undisturbed, but the first has a serious break at Indianapolis. The Pennsylvania Central has gained the following result, which cannot be disturbed: 1st, a through route from Pittsburg, Columbus and Logansport to Chicago; 2d, a through route from Columbus, Indianapolis and Terre Haute to St. Louis; 3d, a new line to be completed north-west from Indianapolis via Danville to Cairo by way of the new Terre Haute and St. Louis Road and the Illinois Central; 5th, a direct route via Cambridge and Columbus, Indiana, to Jeffersonville, and the routes then southward; and, finally, when the Little Miami lease is completed, a through route from Columbus, Ohio, to Cincinnati, and thence to the system of roads which must diverge from this point for southern business. Whatever may be the result of the contest for the control of the Pittsburg, Fort Wayne and Chicago Road, the Pennsylvania Central has secured its western and southern outlets to Cincinnati, Louisville, Cairo, St. Louis, Pekin and Chicago. The Erie Line has secured, beyond peradventure, an excellent consolidated broad gauge line from New York to Cleveland and Cincinnati, and close connection westward to St. Louis, over the Ohio and Mississippi Road, with good connections for Louisville, Evansville and Cairo; also, that which is of more importance to its interests, and abandonment of the reduction of gauge on Ohio and Mississippi line, which had been already begun, and at each of the important centers on our western rivers is prepared to enter on active competition for business with the narrow gauge lines. The Baltimore and Ohio line, by assuming control of the Marietta and Cincinnati Road, and having the advantage of shortest distance to tide-water from Cincinnati, enters the field of competition for western business, with a consolidated line from Baltimore to Cincinnati, and by reason of its close connections with the Indianapolis, Cincinnati and Lafayette Road, a virtually consolidated route to St. Louis over a new road from Indianapolis to Terre Haute, thence to St. Louis via Paris, and to the north-west by the connections over Chicago and Great Eastern, and at Lafayette to the West by the Toledo, Wabash and Western for Springfield and Keokuk.

**CENTRAL PACIFIC RAILROAD BONDS.**—Messrs. Fisk & Hatch, the agents for the negotiation of the First Mortgage Bonds of this Company, announce that the loan is closed, as the full amount of bonds have been disposed of.

**MACON AND BRUNSWICK RAILROAD.**—The report of the President of the Macon, Ga., and Brunswick Railroad shows that 31 miles of the new road, under the new contract, have already been completed, and are now in running order. The new contract had about 150 miles of the road to build, and the vigorous manner in which the road has been pushed along, and is still progressing, leaves no doubt that the whole road will be completed and in running order by the first of November next at the furthest.

# ONE THOUSAND MILES OF THE UNION PACIFIC RAILROAD ARE NOW COMPLETED.

As 500 miles of the western portion of the line, beginning at Sacramento, are also done, but

## 267 MILES REMAIN

To be Finished, to Open the Grand Through Line to the Pacific. This Opening will certainly take place Early this Season.

Besides a donation from the Government of 12,800 acres of land per mile, the Company is entitled to a subsidy in United States Bonds on its line as completed and accepted at the average rate of about \$26,500 per mile, according to the difficulties encountered, for which the Government takes a second lien as security. Whether subsidies are given to any other companies or not, the Government will comply with all its contracts with the Union Pacific Railroad Company. Nearly the whole amount of bonds to which the Company will be entitled have already been delivered.

## FIRST MORTGAGE BONDS AT PAR.

By its charter the Company is permitted to issue its own FIRST MORTGAGE BONDS to the same amount as the Government Bonds; AND NO MORE. These Bonds are a First Mortgage upon the entire road and all its equipments.

THEY HAVE THIRTY YEARS TO RUN, AT SIX PER CENT, and both

## PRINCIPAL AND INTEREST ARE PAYABLE IN GOLD.

Such securities are generally valuable in proportion to the length of time they have to run. The longest six per cent gold interest bonds of the U. S. (the '81's) will be due in 12 years, and they are worth 112. If they had 30 years to run, they would stand at not less than 125. A perfectly safe First Mortgage Bond like the Union Pacific should approach this rate. The demand for European investment is already considerable, and on the completion of the work will doubtless carry the price to a large premium.

## SECURITY OF THE BONDS.

It needs no argument to show that a First Mortgage of \$26,500 per mile upon what for a long time must be the only railroad connecting the Atlantic and Pacific States is PERFECTLY SECURE. The entire amount of the mortgage will be about \$30,000,000, and the interest \$1,800,000 per annum in gold. The present currency cost of this interest is less than \$2,500,000 per annum, while the gross earnings for the year 1868, FROM WAY BUSINESS only, on AN AVERAGE OF LESS THAN 700 MILES OF ROAD IN OPERATION, WERE MORE THAN

## FIVE MILLION DOLLARS.

The details of which are as follows:

From Passengers .....	\$1,024,005 97
" Freight .....	2,040,283 19
" Express .....	51,423 08
" Mails .....	136,235 59
" Miscellaneous .....	91,626 27
" Government troops .....	104,977 77
" " freight .....	449,440 38
" Contractors' men .....	201,179 09
" " material .....	968,430 32
Total .....	\$5,066,651 61

This large amount is only an indication of the immense traffic that must go over the through line in a few months, when the great tide of Pacific coast travel and trade will begin. It is estimated that this business must make the earnings of the road from FIFTEEN TO TWENTY MILLIONS A YEAR.

As the supply of these Bonds will soon cease, parties who desire to invest in them will find it for their interest to do so at once. The price for the present is par and accrued interest from January 1, in currency.

Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau Street

AND BY

John J. Cisco & Son, Bankers, No. 59 Wall Street.

And by the Company's advertised agents throughout the United States.

Bonds sent free, but parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP was issued October 1st, containing a report of the progress of the work to that date, and a more complete statement in relation to the value of the bonds than can be given in an advertisement, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer New York.

January 20th, 1869.
